

LOADHOG

Pally & Lid Case Study

CLIPPER LOGISTICS

The Loadhog Pallet Lid system brings us significant labour efficiencies at our distribution centre. Alongside the labour savings, it also reduces our stretch wrap waste to landfill by over 7 million metres per year.

Clipper Logistics

OUTCOME

100%

Return on investment in less than 5 months.

Clipper Logistics - Benefits experienced

Reduction in labour time, 65 seconds per pallet
Additional labour time savings with marshalling between wrap machines removed from the process.

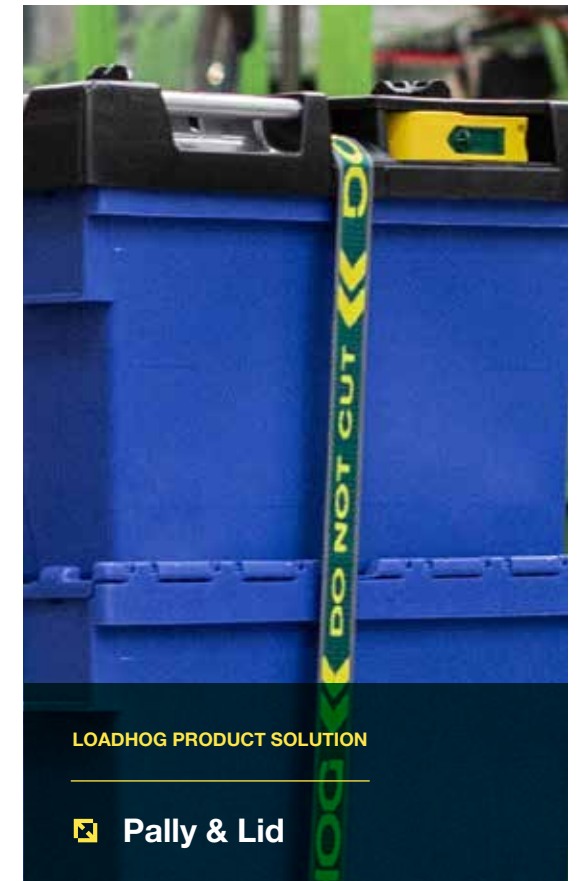

Removal of stretch wrap
7 million metres of stretch wrap removed per year.

Additional security of totes
6 Pally's fit into the small delivery vehicle used vs the original approach of 5 roll cages.

Increased Safety
With no stretch wrap hazards within the operation, safety has been improved throughout the supply chain.

LOADHOG PRODUCT SOLUTION

Pally & Lid

Reduction In Labour Time

The Loadhog Pally & Lid

The Pally is a half-euro sized plastic pallet which becomes a wheeled dolly at the single press of a foot pedal. It is an efficient solution for moving products without other manual handling equipment required able to withstand a loading capacity of up to 500kg.
